Education

Ph.D. Computer Science — **Aug 2026 – Present**
New Mexico State University — NM, USA

B.S. Computer Science — **Sep 2018 – Sep 2022**
International Islamic University — Islamabad, Pakistan

Research Experience

- **Graduate Research Assistant** — **Aug 2026 – Present**
  NMSU — NM, USA
  - Working on the ethical design of honeypot scientific papers and open source honeypot tools.
  - **Advisor:** Dr. Efren Lopez Morales

Teaching Experience

- **Graduate Teaching Assistant** — **Aug 2026 – Present**
  NMSU — NM, USA
  - CSCI 4240/CSCI 5240 - SOFTWARE REVERSE ENGINEERING (Fall 2026)
- **Section Leader (Instructor)** | [Link] — **Apr 2026 – May 2026**
  Stanford CiP — Remote, CA, USA
  - Selected as a Section Leader (Volunteer) for Stanford University: Code in Place 2026.
  - Led weekly sessions and taught CS106A - Introduction to Python to a globally diverse cohort of students.
- **Junior Lecturer** — **Jul 2024 – May 2025**
  Iqra University — Islamabad, Pakistan
  - Courses (labs) taught:
    CMC111 - Programming Fundamentals (Spring 2025, Fall 2024)
    CMC331 - Database Management System (Spring 2025, Fall 2024)
    GER111 - Application of Information & Communication Technology (Spring 2025)
    CMC123 - Digital and Logic Design (Spring 2025)
    CMC251 - Data Structure & Algorithms (Spring 2025, Summer 2024)
    CMC112 - Object Oriented Programming (Fall 2024)
    CSC471 - Artificial Intelligence (Summer 2024)

Professional Experience

- **Software Engineer (Freelance, Part-time)** — **May 2021 – Jan 2024; Jul 2024 – Jul 2026**
  FIVERR — Remote
  - Delivered full-stack web development, database design, and software solutions to global clients across 300+ projects.
  - Designed and deployed scalable, high-performance applications using modern frameworks and APIs.
- **Web Developer** — **Mar 2024 – Jun 2024**
  Dynamics 360 — Islamabad, Pakistan
  - Upgraded and optimized the company's content management system, improving performance and usability.
  - Enhanced website functionality and resolved navigation and URL structure issues.
  - Developed a custom portfolio website to showcase company projects and services.
- **Web Developer** — **Mar 2023 – Sep 2023**
  Centangle Interactive — Islamabad, Pakistan
  - Developed a data management system for GIZ, replacing manual Excel-based workflows with an automated web solution.
  - Built employee and department management systems using PHP and MySQL.

- Designed an interactive sales dashboard for tracking products, sales, and client feedback.

- **Trainee (MERN)** **Dec 2022 – Feb 2023**
  QC360 Rawalpindi, Pakistan
  - Gained hands-on experience in full-stack development using MongoDB, Express.js, React, and Node.js.
  - Developed an e-commerce application with integrated frontend and backend functionality.
  - Implemented CRUD-based systems to improve data organization and accessibility.

Projects

- **AI Vulnerability Assessment |** [GitHub]
  - Set up a containerized environment (Docker, Ollama) to evaluate LLMs.
  - Used Garak for prompt-injection/jailbreak testing.
  - DependencyCheck for dependency vulnerabilities, and Giskard for systematic adversarial evaluation.
  - Produced vulnerability reports for Microsoft Phi-3-Mini and open-source LLMs.
- **Dynamics360 Dashboard |** [GitHub]
  - Developed a dynamic admin dashboard to manage company data through an intuitive web interface.
  - Replaced manual database operations with automated CRUD functionalities, improving efficiency and data integrity.
  - Designed backend logic to enable seamless data management, including secure add, update, and delete operations.
- **Digi64 |** [Link]
  - Developed a company website, highlighting services in custom software application development.
  - Implemented a responsive, user-focused design to ensure seamless functionality across desktops, tablets, and mobile devices.
  - Enhanced site structure, navigation, and UI/UX to improve accessibility and overall user engagement.
- **ERP |** [GitHub]
  - Developed a full-stack ERP web application, enabling management of products, raw materials, suppliers, workforce, and operational workflows.
  - Designed and implemented modular system architecture with role-based access control, ensuring secure and scalable data handling across different user roles.
  - Built dynamic dashboards and database-driven features to streamline inventory tracking, resource allocation, and business process automation.

Invited Talks

- **Guest Lecturer** @UET Lahore, GCW University & MEPS **|** Python Programming | [Link1][Link2] **19-20 May 2026**

Honors and Awards

- **Chinese Govt. Scholarship |** Selected for Fully Funded CSC Scholarship at Wuhan University. [Link]
- **International Islamic University |** Merit Scholarship Recipient, Undergraduate, Jan 2019.
- **Quaid-i-Azam University |** Prime Minister Laptop Recipient, Undergraduate, Jul 2018.
- **Punjab College |** Merit Scholarship Recipient, High school, Aug 2015.
- **LeetCode |** Solved **250+** Data Structure and Algorithms problems. [Link]

Skills

- **Programming Languages:** Python, Java, C++, PHP, JavaScript, SQL
- **Web & Frameworks:** HTML, CSS, Bootstrap, React.js, Express.js, Django, Yii2
- **Databases:** MySQL, SQLite, MS Access
- **Tools & Technologies:** Git, GitHub, Docker
